

Call for Papers

PATTERN ANALYSIS & RECOGNITION APPLICATIONS IN BIOMETRICS

A special track of the *INTERNATIONAL SYMPOSIUM ON VISUAL COMPUTING (ISVC05)*

<http://www.isvc05.net/>

Rationale: Biometrics has been the focus of recent research work due to their importance in the security industry. It is a technology that could be used as an alternative or integration to existing authentication applications and technologies – such as domain access, encryption, and digital signature – and it is based on the unique physical body demographics and/or behavioral characteristics of a person.

In this special track, the main goal is the exchange of the latest theoretical and experimental results in the area of biometric applications.

Topics: Topics of interest include all aspects of pattern analysis and recognition applied to biometrics including, but not limited to, the following areas

- Ear/Face/Iris/Retina Recognition
- Gait Recognition
- Finger/Hand Geometry
- Signature Recognition
- DNA Recognition

Submission/Proceedings: This is an open call-for-papers. Only original, high-quality papers, in-line with the ISVC'05 standard guidelines, will be considered for publication in this special track. Prospective authors should submit electronically their contributions through the website of ISVC'05 <http://oct1.cse.unr.edu/>. Accepted papers will appear in the symposium proceedings which will be published by Springer-Verlag in the Lecture Notes in Computer Science (LNCS) series.

Important Dates:

Submission deadline: June 13, 2005

Notification of acceptance: August 1, 2005

Camera-ready version: August 29, 2005

Workshop Date: December 5-7, 2005

Organizing Committee:

- **Prof Nello Cristianini**, *UC Davis, Department of Statistics*
nello@wald.ucdavis.edu
- **Dr Salil Prabhakar**, *DigitalPersona Inc., Algorithms Research Group*
SalilP@digitalpersona.com
- **Dr Konstantinos Veropoulos**, *UNR, Dept of Computer Science & Engineering*
verop@unr.edu
