

#### Steering Committee:

Bebis George, Univ of Nevada, Reno, USA (Chair)  
Parvin Bahram, Berkeley National Lab, USA  
Boyle Richard, NASA Ames Research Center, USA  
Koracin Darko, Desert Research Institute, USA

#### Computer Vision Chairs:

Li Baoxin, Arizona State University, USA  
Porikli Fatih, Mitsubishi Electric Research Labs, USA

#### Computer Graphics Chairs:

Zordan Victor, Univ of California at Riverside, USA  
Klosowski James, AT&T Research Labs, USA

#### Virtual Reality Chairs:

Coquillart Sabine, INRIA, France  
Luo Xun, Qualcomm Research, USA

#### Visualization Chairs:

Chen Min, University of Oxford, UK  
Gotz David, IBM, USA

#### Keynote Speakers:

Belongie Serge, Univ of California, San Diego, USA  
Metaxas Dimitris, Rutgers University, USA  
Hoogs Anthony, Kitware, USA  
Slater Mel, University College London, UK  
Ertl Thomas, Univ of Stuttgart, Germany  
Dennis Zorin, New York University, USA

# CALL FOR PAPERS & SPECIAL TRACKS

## 9<sup>th</sup> International Symposium on Visual Computing

**ISVC'13**  
July 29-31, 2013  
Aquila Rithymna Beach Hotel  
Crete, Greece

<http://www.isvc.net>

### Scope

The purpose of the International Symposium on Visual Computing (ISVC) is to provide a common forum for researchers, scientists, engineers and practitioners throughout the world to present their latest research findings, ideas, developments and applications in the broader area of visual computing. ISVC'13 will consist of invited and contributed presentations dealing with all aspects of visual computing. The symposium will include several keynote speakers, posters sessions, and special tracks.

### Topics

ISVC seeks papers describing contributions to the state of the art and state of the practice in the field of visual computing. The symposium is structured around the four central areas of visual computing: (1) **computer vision**, (2) **computer graphics**, (3) **virtual reality**, and (4) **visualization**. In particular, we are interested in papers that combine technologies from two or more of these areas.

**Computer Vision:** Early and Biologically-Inspired Vision; Color and Texture; Illumination and Reflectance Modeling; Segmentation and Grouping; Object Recognition/Detection/Categorization; Motion and Tracking; Video Analysis and Event Recognition; Biometrics (Face, Fingerprint, Hand, Iris); Pattern Recognition; Statistical Methods and Learning; Document Analysis; Medical Image Analysis; Image and Video Retrieval; 3D Reconstruction; Shape from X; Physics-based Modeling; Image-Based Modeling; Computational Photography; Human-Computer Interfaces; Vision for Graphics; Vision for Robotics; Performance Evaluation; Sensors and Systems; Secure Image/Video Communication; Image/Video Encoding/Compression; Applications

**Computer Graphics:** Geometric Modeling; Physically Based Modeling; Geometric Computing; Shape and Surface Modeling; Graphics Algorithms; Web Based Graphics; Perceptual Aspects of Computer Graphics; Computer Animation; Special Effects; Multimedia and Digital Media; Computational Photography; Image-Based Computer Graphics; Rendering Techniques; Stylized Rendering; Global Illumination, Photo-Realistic Computer Graphics; Volume Graphics, Semi-Transparent Media; Graphics System Architectures; Graphics Hardware and Hardware-Related Techniques (GPU); Data Compression for Graphics; Computer Graphics for Small/Large Displays; Parallelism in Computer Graphics; Graphic Toolkits; Interaction and HCI; Simulation for Computer Graphics; Applications.

**Virtual Reality:** Augmented Reality; Mixed Reality; Artificial Reality; Real-Time Rendering; Collision detection in VR; 3D Interaction for VR; Modeling and Simulation; Virtual Humans and Artificial Life; VR Systems and Toolkits; Collaborative Virtual Environments; Tele-collaboration; VR System Architecture; Multimodal displays; Projection and Display Systems; Human Computer Interaction; Presence and Cognition; Integration of VR and Multimedia; Immersive Gaming; Multi-user and Distributed VR and Gaming; Serious Games; Haptics, Audio, and Other Non-Visual Interfaces; Tracking and Sensing; Human Factors; User Studies and Evaluation; Hardware Devices; Applications

**Visualization:** Visualization Taxonomies and Models; Information Visualization; Scalar, Vector, and Tensor Visualization; Multi-dimensional and Multi-resolution Data Visualization; Time Series Data Visualization; Medical Data Visualization; Molecular Data Visualization; Geographic Data Visualization; Volume Visualization; Flow Visualization; Large Scale Data Set Visualization; Collaborative and Distributive Visualization; Isosurfaces; Rendering Techniques; Visualization Systems; Visual Analytics, Visual Data Mining and Knowledge Discovery; Display and Interaction Technology; Human Perception and Cognition; Human Factors; Haptics for Visualization; Evaluation and User Studies; Hardware for Visualization; Mesh Techniques and Compression; Applications.

### Submission Procedure

Papers submitted to ISVC'13 must not have been previously published and must not be currently under consideration for publication elsewhere. All papers accepted will appear in the symposium proceedings which will be published by **Springer-Verlag** in **Lecture Notes in Computer Science (LNCS)**.

### Special Tracks / Best Paper Award

Special tracks are intended to stimulate in-depth discussions in special areas relevant to the symposium theme. Significantly extended and revised versions of selected papers will be considered for publication in a special issue of the *International Journal on Artificial Intelligence Tools (IJAIT)* (ISI/SCIE indexed). Also, a "best paper" award (\$500) will be sponsored by Mitsubishi Electric Research Labs (MERL).

### Important Dates:

Paper submissions:	May 10, 2013
Notification of acceptance:	June 10, 2013
Final camera ready paper:	June 28, 2013
Advance Registration:	June 28, 2013
ISVC'13 Symposium:	July 29-31, 2013
